

Baseline

The invisible line on which all characters sit.

Capital Height or Cap Height

The height of a capital letter.

x-height

Literally the height of a letter 'x'.

Ascender

An upward vertical stroke found on the part of lowercase letters that extends above the typeface's x-height.

Descender

The part of the letters that extends below the baseline.

Ascender height

Often slightly above the cap height.

Descender line

Overhang

Curved characters such as o, e & s often hang slightly over the cap height, x-height or baseline.

Serif

Serif

A serif is the little extra stroke found at the end of main vertical and horizontal strokes of some letterforms. Serifs fall into various groups and can be generally described as hairline (hair), square (slab), or wedge.

Some special serif-like character parts are spurs and beaks.

Leg

Leg
The lower, down sloping stroke of the K and k is called a leg. The same stroke on R as well as the tail of a Q is sometimes also called a leg.

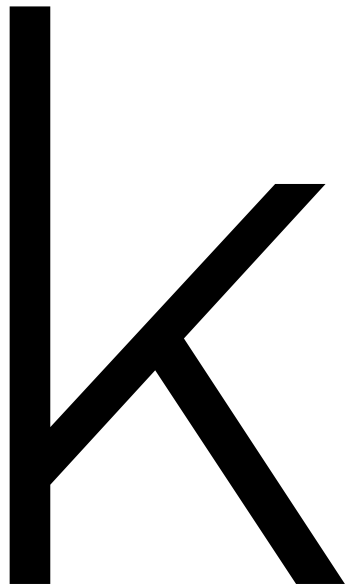

Leg

Leg
The lower, down sloping stroke of the K and k is called a leg. The same stroke on R as well as the tail of a Q is sometimes also called a leg.

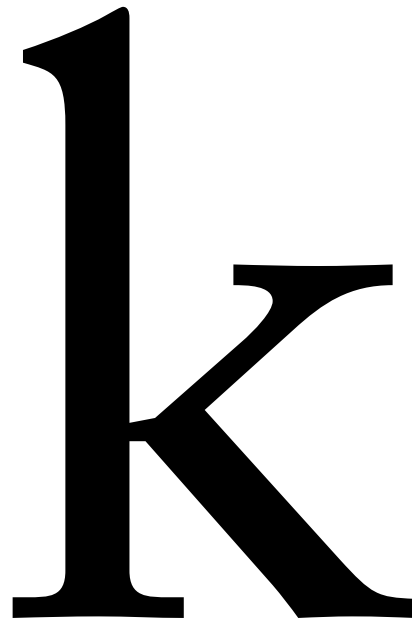

Leg

Leg
The lower, down sloping stroke of the K and k is called a leg. The same stroke on R as well as the tail of a Q is sometimes also called a leg.

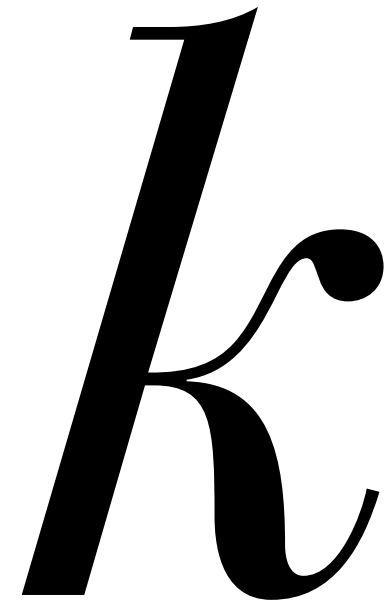

A pair of the letters 'K' and 'k' in the Akkurat Light font. The 'K' is a simple, clean, sans-serif design with a vertical stem and two diagonal strokes meeting at a sharp point. The 'k' is a lowercase version of the same design, also simple and clean.

Akkurat Light

A pair of the letters 'K' and 'k' in the Sabon Roman font. The 'K' is a classic serif font with a thick vertical stem, a horizontal crossbar, and a diagonal stroke that curves slightly at the top. The 'k' is a lowercase version of the same design, featuring a thick stem and a diagonal stroke that curves at the top.

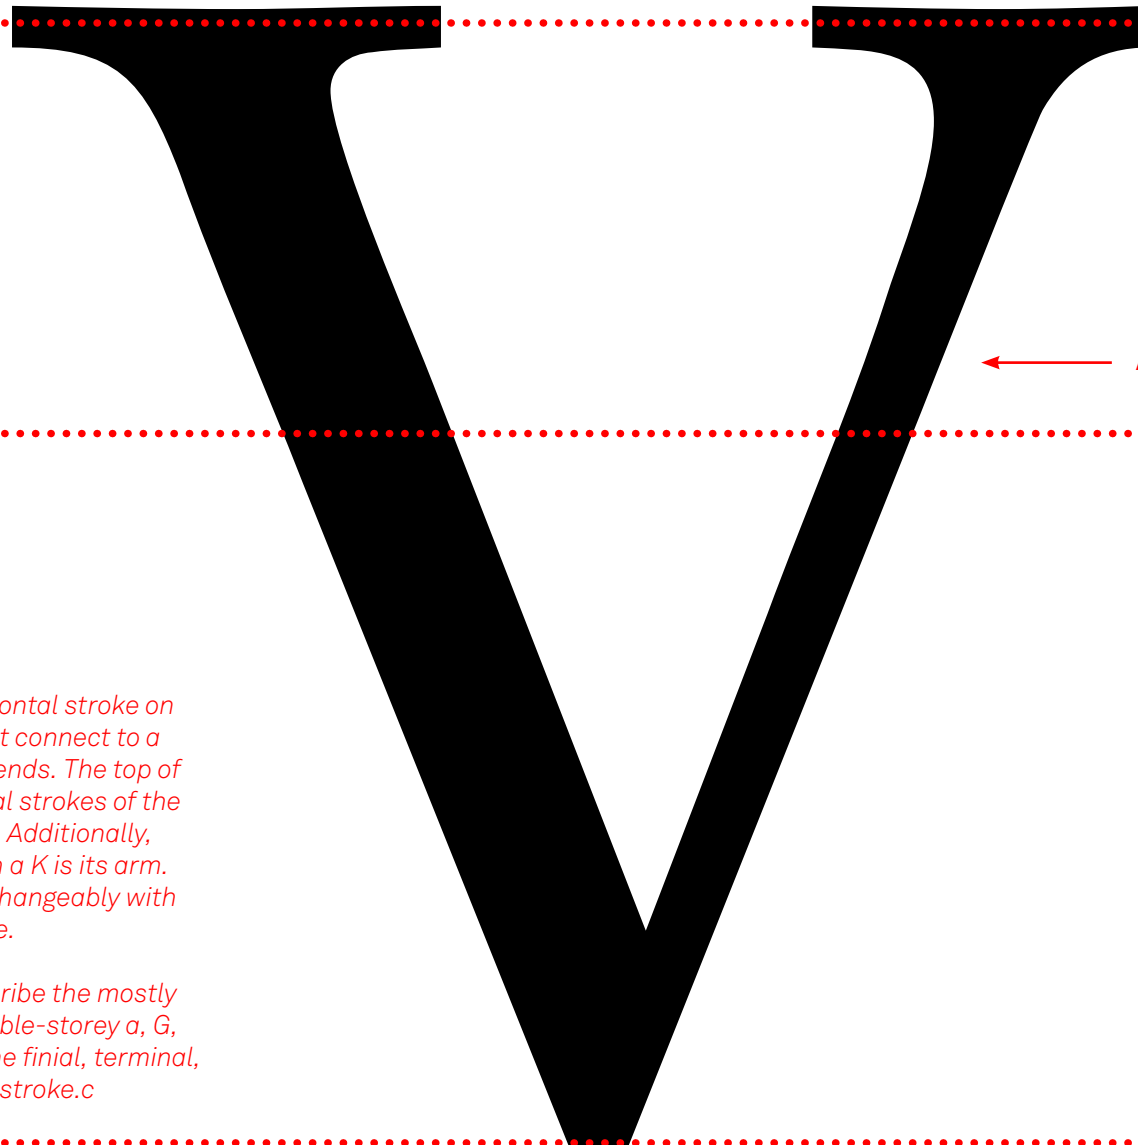

Sabon Roman

A pair of the letters 'K' and 'k' in the Bauer Bodoni Italic font. The 'K' is a highly stylized, italicized serif font with a very thin vertical stem and a diagonal stroke that curves sharply at the top. The 'k' is a lowercase version of the same design, featuring a thin stem and a diagonal stroke that curves sharply at the top.

Bauer Bodoni Italic

Arm

Arm

The arm of a letter is the horizontal stroke on some characters that does not connect to a stroke or stem at one or both ends. The top of the capital T and the horizontal strokes of the F and E are examples of arms. Additionally, the diagonal upward stroke on a K is its arm. Sometimes arm is used interchangeably with bar or crossbar or cross stroke.

Arm is often also used to describe the mostly horizontal top stroke of C, double-storey a, G, and other glyphs, to include the finial, terminal, spur, or other elements of the stroke.

Arm

Arm

The arm of a letter is the horizontal stroke on some characters that does not connect to a stroke or stem at one or both ends. The top of the capital T and the horizontal strokes of the F and E are examples of arms. Additionally, the diagonal upward stroke on a K is its arm. Sometimes arm is used interchangeably with bar or crossbar or cross stroke.

Arm is often also used to describe the mostly horizontal top stroke of C, double-storey a, G, and other glyphs, to include the finial, terminal, spur, or other elements of the stroke.

Stem

Stem (a.k.a stroke)

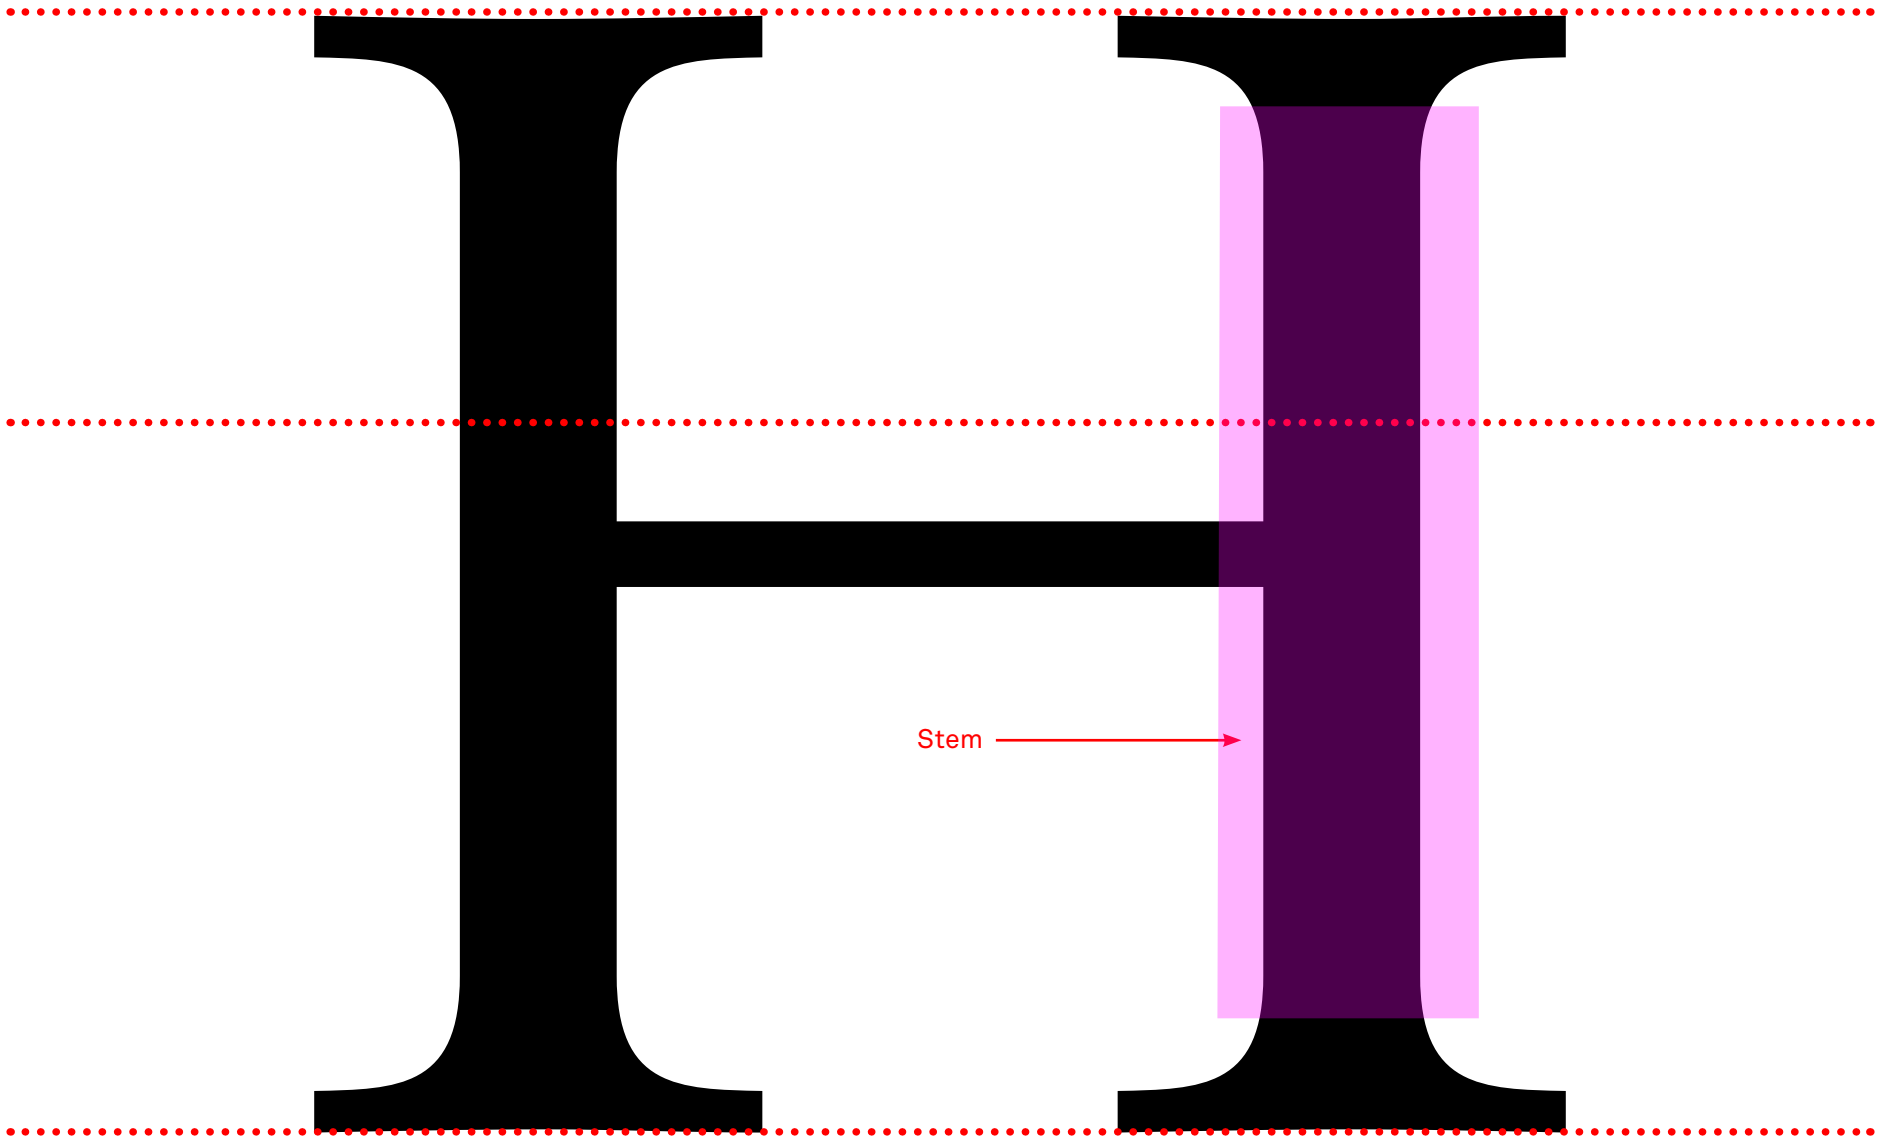

Vertical, full-length stroke in upright characters. Definition: The stem is the main, usually vertical stroke of a letterform.

Stem

Stem (a.k.a stroke)

Vertical, full-length stroke in upright characters. Definition: The stem is the main, usually vertical stroke of a letterform.

Bar

Bar (a.k.a Crossbar)

The (usually) horizontal stroke across the middle of uppercase A and H is a bar. The horizontal or sloping stroke enclosing the bottom of the eye of an e is also a bar.

Bar

Bar (a.k.a Crossbar)

The (usually) horizontal stroke across the middle of uppercase A and H is a bar. The horizontal or sloping stroke enclosing the bottom of the eye of an e is also a bar.

Counter

Counter

The enclosed or partially enclosed circular or curved negative space (white space) of some letters such as d, o, and s is the counter. The term counter may sometimes be used to refer only to closed space, while partially enclosed spaces in m, n, or h are the aperture.

Counter

Counter

Counter

The enclosed or partially enclosed circular or curved negative space (white space) of some letters such as d, o, and s is the counter. The term counter may sometimes be used to refer only to closed space, while partially enclosed spaces in m, n, or h are the aperture.

Open Counter

Open Counter

The partially open space within a character that is open on one end.

Open Counter →

A large, bold, black letter 'C' is centered on the page. A red arrow points from the text 'Open Counter' to the open space inside the letter. Two horizontal red dotted lines are positioned above and below the letter, framing it.

Open Counter

Bowl

Bowl

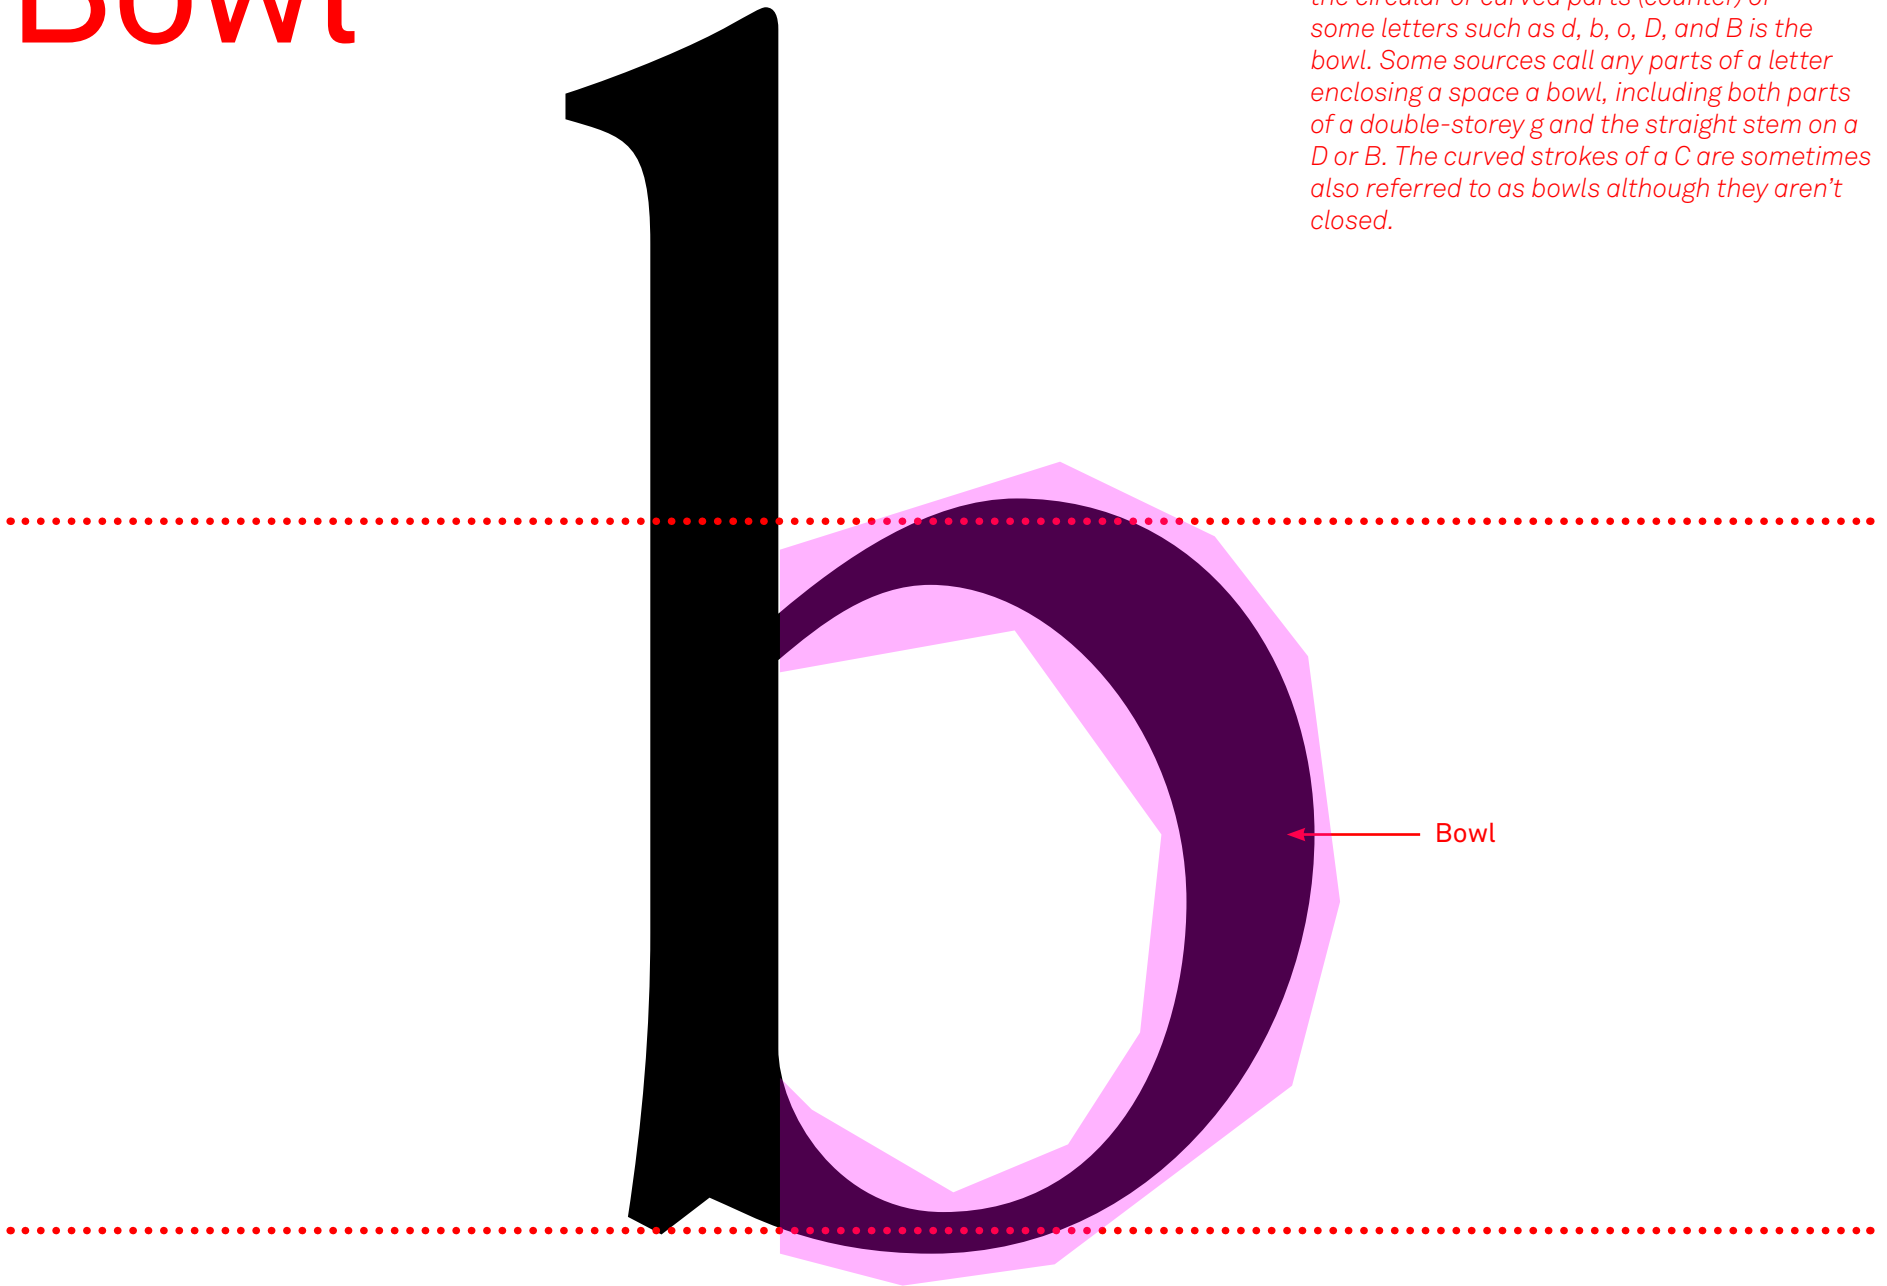

The curved part of the character that encloses the circular or curved parts (counter) of some letters such as d, b, o, D, and B is the bowl. Some sources call any parts of a letter enclosing a space a bowl, including both parts of a double-storey g and the straight stem on a D or B. The curved strokes of a C are sometimes also referred to as bowls although they aren't closed.

Bowl

Bowl

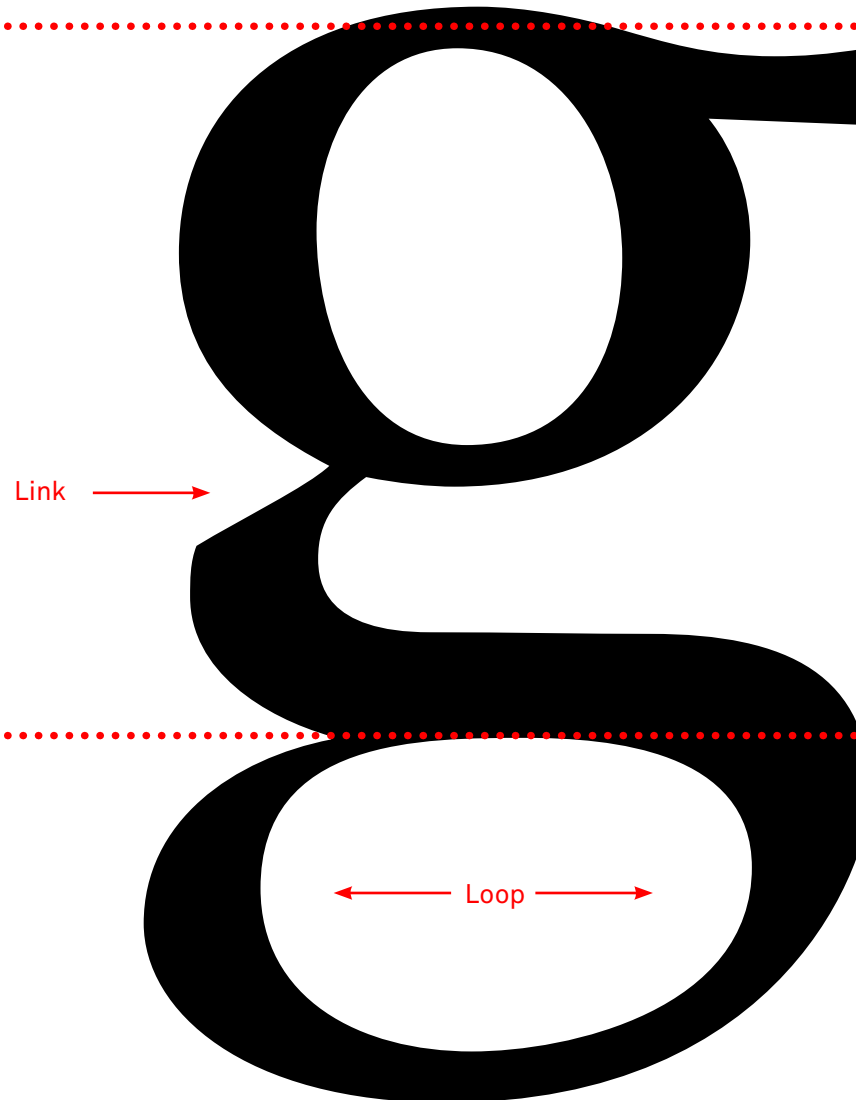

The curved part of the character that encloses the circular or curved parts (counter) of some letters such as d, b, o, D, and B is the bowl. Some sources call any parts of a letter enclosing a space a bowl, including both parts of a double-storey g and the straight stem on a D or B. The curved strokes of a C are sometimes also referred to as bowls although they aren't closed.

Loop & Link

Loop

In a double-storey g, the loop is the enclosed or partially enclosed counter below the baseline that is connected to the bowl by a link. The enclosed or partially enclosed extenders on cursive p, b, l, and similar letters are also called loops.

Link a.k.a neck

The link is that small, usually curved stroke that connects the bowl and loop of a double-storey g.

Loop & Link

Loop

Glossary

Typeface

*The overall design of a type family
Gill Sans, Univers & Georgia are all typefaces.*

Font

Referring back to when type was cast in molten metal using a mould, or font. A font is how a typeface is delivered. So you can have both a metal handmade font and a digital font file of the same typeface, e.g Times or Futura.

Serif

Short strokes at the ends of horizontal and vertical strokes of characters. Generally considered to be easier to read for large quantities of text, and often, but not always, associated with more traditional and older themes.

Sans-Serif

Taken from the French word sans, meaning 'without', sans serif simply means without serifs. Generally, but not always, considered to be associated with modern themes.

Slab Serif

A typeface with weightier, 'slab-like' serifs.

Uppercase

CAPITAL LETTERS

Lowercase

non-capital letters

Mixed-case

A mix of the two above, that conforms to the standard rules of a normal sentence. Sometimes called sentence-case.

Title-case

Capitalising all of the major words in a sentence. There are various schools of thought as to what defines a 'major' word, but it tends to look neater when connecting words like and, the, to, but, is & my remain lowercase.

Display font

A typeface or font designed to be used at larger sizes, like headers or on title pages. Usually too intricate or too bold to be legible at small sizes.

Body font

A typeface or font designed to be used for greater amounts of text (often called 'body copy' or 'body

text'). Readable at smaller sizes.

Leading

The space set above and below lines of text. This text is 9pt in size, with 11pt leading.

Kerning

The adjustment of the space between individual characters. Good typographers hand-adjust kerning by eye for perfectly balanced spacing.

Tracking

The adjustment of the overall spacing between characters, usually for larger amounts of text.

*Taken from: Basic typographic principles: A guide by The
Typographic Circle*

Kerning

Kerning

The reduction of white space between two characters (inter-character space)

Avenue

Avenue

Kerning

Kerning

The reduction of white space between two characters (inter-character space)

Takes two

SCALA, WITH KERNING SUPPRESSED

Spacing appears uneven, with gaps around the T and w.

LOVE LETTERS

The VE and TT combinations make the whole word look mismatched.

Takes two

SCALA, WITH KERNING

Spacing seems more even.

LOVE LETTERS

Kerning has been manually adjusted for a more even appearance.

nearly touch

SCALA ITALIC, WITH KERNING SUPPRESSED

A gap appears between the l and y.

rub my back

nearly touch

SCALA ITALIC, WITH KERNING

The intimacy of italic requires kerning.

TYPE CRIME:

TOO MUCH SPACE

*Mind the gap,
especially at larger
sizes*

Kerning

Kerning

The reduction of white space between two characters (inter-character space)

Leading

Leading

The white space inserted between lines of type to give more readable and attractive appearance. The term is derived from the thin strips of non-printing lead that are used to separate lines of hot metal type.

Hanging quotes

Ugh. _____

**“The first rule of
Fight Club is: You do not
talk about Fight Club.”**

Above is an example of 'un-hung' quote marks. Hanging quotes simply means to ensure that any quote marks 'hang' over the straight edge of your type. The negative space created when we don't do this is ugly and creates an uneven looking edge.

Better. _____

**“The second rule of
Fight Club is: You do not
talk about Fight Club.”**

By hanging our quote marks over the edge – we give ourselves a cleaner, straighter vertical line, which looks much more elegant and considered.

The same rule applies to longer copy

“Fight Club is a 1999 American film based on the 1996 novel of the same name by Chuck Palahniuk. The film was directed by David Fincher and stars Edward Norton, Brad Pitt, and Helena Bonham Carter. Ed Norton plays the unnamed protagonist, “an everyman” who is discontented with his white-collar job. He forms a “fight club” with soap maker Tyler Durden, played by Pitt, and becomes embroiled in a relationship with him and a dissolute woman, Marla Singer, played by Bonham Carter”.

Typeface (above) = Trade Gothic Bold Condensed

Punctuation

200pt Janson Text typewriter apostrophe (single quotation mark) and double quotation marks, which are often used to indicate feet and inches.

200pt Symbol prime and double prime marks. Before the invention of computers, typesetters used these marks to denote feet and inches, and they remain the preferred marks to use when setting measurements.

200pt Janson Text true apostrophe and opening and closing double quotation marks. In all settings, these remain the preferred marks.

The lounge measures 23' 6" by 12' 9".

21/24pt Janson Text range left to 116mm. This setting uses Symbol prime and double prime marks to indicate feet and inches.

The lounge measures 23' 6" by 12' 9".

21/24pt Janson Text range left to 116mm using Janson Text Italic typewriter apostrophe and double quotation marks as feet and inch symbols. This approach is a useful alternative to the one shown above.

"Undoubtedly, it's the best (if not the toughest) course I've ever been on."

21/24pt Janson Text range left to 116mm with typewriter quotation marks and apostrophe. For a more considered and crafted setting, avoid using these marks; use true apostrophes and quotation marks instead (see below).

Setting a comma is a good indication of what the correct apostrophe and opening and closing quotation marks look like. Think of '66' and '99'.

“Undoubtedly, it's the best (if not the toughest) course I've ever been on.”

21/24pt Janson Text range left to 116mm with hanging punctuation and true opening and closing quotation marks and apostrophe. These should be used in preference to typewriter marks.

Punctuation

It's about the hands-on experience
of setting metal type.

Hyphens link words or indicate a break in a word at the end of a line.

The Edinburgh–London train
is ready to depart.

The Picasso exhibition is open
16–30 October.

*The en dash (approximately the width of a lowercase 'n') indicates a range of values
or a connection between two things of almost any kind: numbers, people or places.*

I wish you'd—oh, never mind.

*The em dash (approximately the width of a capital 'M') marks an abrupt change of
thought or a transition within a sentence.*

En dash

Em dash

*To avoid confusion, because 'en' and 'em' sound similar, they are also referred to as
a 'nut dash' and a 'mutton dash' respectively.*
