

STABLE AND STATIONARY POPULATION MODELS

POPULATION

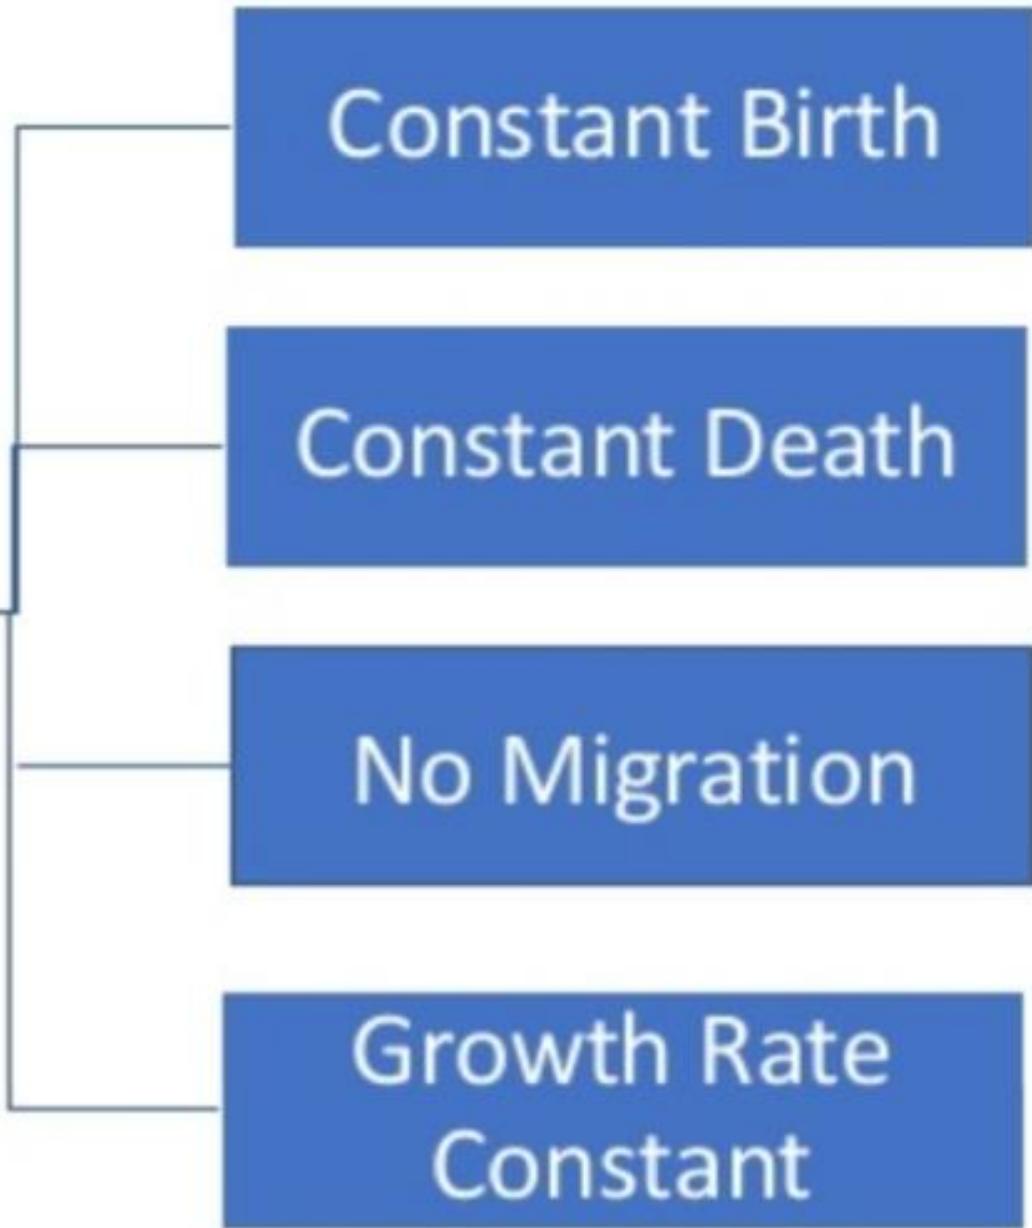

According to statistician population means collection of items, for example, balls in an urn.

Demographers use the term to denote the collection of persons alive at a specific point in time who meet certain criteria.

STABLE POPULATION

Stable Population

STATIONARY POPULATION

Stationary Population

Constant Birth

Constant Death

No Migration

Zero Growth Rate

BIRTH=DEATH

NOT ALL STABLE POPULATION ARE
STATIONARY BUT STATIONARY
POPULATION ALWAYS TERMED AS STABLE
POPULATION.

HOW??????????

Stationary Population is a type of Stable Population
