# Management Information Systems

## Chapter 11: Managing Knowledge

### INFERENCE ENGINES IN EXPERT SYSTEMS

**FIGURE 11-6** An inference engine works by searching through the rules and “firing” those rules that are triggered by facts gathered and entered by the user. Basically, a collection of rules is similar to a series of nested IF statements in a traditional software program; however, the magnitude of the statements and degree of nesting are much greater in an expert system.
