Project title:

Islamic education to children and providing first aid box in corona condition.

Why this project is needed?

As we all know the whole world is in the grip of covid-19 And the corona virus has wreaked havoc.our country Pakistan has also been greatly affected by this virus. This virus killed many precious lives and not seem to stopping.Due to covid-19 there is lock down in Pakistan all the nation have been locked into their houses.people cannot go out from the houses.And the children cannot go to the mosque due to lock down.And the purpose of giving first aid box to people is because gathering at medical stores will decreases.people can cure themselves at home in minor health problems.

Working of group members are given below.

Tahseen zafar and Shagufta batool :

We have done this project by providing first aid box to our neighbours and providing Islamic education to children.first of all we collect the money from our cousins,sisters and family members.Then we include our pocket money in this and purchase "6" first aid box and provide them to our neighbors so that in case of emergency(at small level)they stay at home so that gathering is not increase at Medical stores.Then we have done this project by providing Islamic education to children.we have done this activity

together.

Khadijah Hameed:

I have completed my project work by starting teaching some students in my neighborhood. I have started this work because as to our project that the condition of our environment is not better due to corona. Some of students could not manage to get education. Their parents are worried about their health and in opinion not to send their children to school because health is more important.

Nadia Khan:

I did my project practically by given free Islamic education and provided first aid boxes to the people. I do not end my efforts because covid-19 increases day by day. First of all I tell you how I gave Islamic education with the help of my fellow friend. I meet the some children, parents and i say that they send their children my house and i gave Islamic education .During covid-19 because they are not going to any mosque so more than 20 children come to my house daily at 4pm. Me and my sister gave Islamic education. we tell them about (fast, pray, reciting Holy Quran and many other Islamic things) Now i tell about first aid boxes as we are living in village. The people of village are not aware about covid-19. so i made more than 30 first aid boxes for this purpose. I collect some money. My father gave 2000Rs my mother gave 1000Rs and my pocket money amount is 7000. I bought 6 dettol bottle price of one bottle is 250 and I bought 30 dettol soap price of one soap is 75Rs I bought more than 30 masks price of one mask is 50 Rs and I bought alcoholic bottles price of one bottle is 120 Rs. I made sanitizer with (Alcoholic +dettol+liquid+water). All these things i gave to the people.

Mahnoor jiskani (group leader)

How did I start this project?

I have done my project with the help of my brother. My youngest brother kumail raza has helped me the most in educating the children because he also use to go to the mosque to recite the quran. I enlisted his help let them take to me all the children who used to go to the mosque but can't go now. So that I can read the Holy Quran to them and teach the rest of Islam. My brother helped me a lot and brought all the children to me. And I said to these children come to me every day at the same time as you used to go to the mosque. Then i will teach you the quran and I will give information about Islam. So the children said we will come. Then I sent a message to the children, s homes to send their children to me .so from the next day the children started to coming. I asked these kids what they had read so far. All the kids told me one by one. so i started teaching these kids from where they had been before. The first three days i just read the quran to everyone Then I started an Islamic book from my smartphone. Then i tested them every week and i gave them prizes. I will continue to teach these children until the situation improves. As far as the first aid box is concerned .Everyone in my village is educated and by the grace of God all are rich. one or two houses were poor but all the villagers helped them so i didn't have to give a first aid box here because they already had it to all. so i gave soap in the mosque on the behalf of my pocket money.
