

**Computer Architecture  
CE-217**

**Laboratory Manual**

## Lab (1): Computer Anatomy

### Objectives

- ❖ Identify the basic components of computer and their working
- ❖ Explain the importance of various units of a computer

### Question (1): What are the four basic functions performed by the computer?

- 1-
- 2-
- 3-
- 4-

### Question (2): Choose the correct answer?

**(a) The task of performing arithmetic and logical operation is performed by.**

- (i) ALU                      (ii) Editor                      (iii) storage                      (iv) output

**(b) The ALU and CPU are jointly known as**

- (i) RAM                      (ii) ROM                      (iii) CPU                      (iv) none of the above

**(c) The process of producing results from the data for getting useful information is called?**

- (i) Output                      (ii) input                      (iii) processing                      (iv) storage

**Question (3):**

**(a) : List four input devices?**

- 1-
- 2-
- 3-
- 4-

**(b) : List four output devices?**

- 1-
- 2-
- 3-
- 4-

**Question (4): What are the major components of computer?**

- 1-
- 2-
- 3-
- 4-

**Question (5): What is CPU and how does it work? Explain briefly?**

-----  
-----  
-----  
-----

**Question (6): What are the four basic functions performed by the computer?**

-----  
-----  
-----

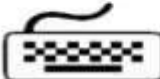

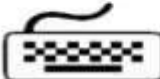

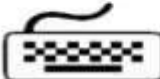

## Computer Anatomy part (2) (Memory and ports)

### Objectives

- ❖ Identify the ports of computer and their working.
- ❖ Explain the types of memory and ports.

**Question (1):** Fill the tables below by write the suitable ports?

A):

			
	<table border="1" style="width: 100%; border-collapse: collapse;"> <tr> <td style="text-align: center;"> keyboard</td> <td style="text-align: center;"> Mouse</td> </tr> </table>	 keyboard	 Mouse
 keyboard	 Mouse		
			

B)

		Notice the pins!
		Watch for the holes!

C)

**Question (2): Differentiate between the following:**

**(a) RAM and ROM**

-----  
-----  
-----

**(b) DRAM and SRAM**

-----  
-----  
-----

**Question (3):**

**a. Distinguish between bit and byte?**

**b. Define volatile and non-volatile memory?**

**Question (4): Write True or False?**

- (a) There are two kinds of computer memory: primary and secondary.
- (b) The computer can understand decimal system also.
- (c) The storage of program and data in the RAM is permanent.
- (d) PROM is secondary memory.
- (e) The memories which do not lose their content on failure of power Supplies are known as non-volatile memories

### Computer Anatomy part (3) (Motherboard and cards)

#### Objectives

- ❖ Identify the computer components and their functions.
- ❖ What is motherboard?

**Question (1):** Write the parts names of motherboard?

**Question (2): Fill in the blanks?**

- (a)..... unit coordinates the activities of all the other units in The system.
- (b) The standard size of display screen is ..... Lines by ..... Characters.

**Question (3): What is Hard Disk?**

**Question (4): Write Performance parameters of hard disk?**

1-

2-

**Question (5): What's a Graphics Card?**

-----  
-----  
-----

**Question (6):**

**a- What is it? - Basic Input Output System**

-----  
-----  
-----

**b- Why is it necessary?**

-----  
-----  
-----

**c- List the important Functions of Basic Input Output System?**

-----  
-----  
-----

**Question (7): Define the following?**

**a- Sound Card**

-----  
-----

**b- Network Interface Card**

-----  
-----

## Lab (2): Numbering systems (part 01)

### Objectives

- ❖ Review and explain the importance types of numbering systems types.
- ❖ Explain the basic operations performed on numbers.

**Question (1):** find the 1<sup>st</sup> and 2<sup>nd</sup> complement of the following decimal values?

- a) 154
- b) - 413

**Question (2):**

1. What is the 3-digit 10's complement of 247?  
a. Answer: \_\_\_\_\_
2. What is the 3-digit 10's complement of 17?  
a. Answer: \_\_\_\_\_
3. 777 is a 10's complement representation of what decimal value?  
a. Answer: \_\_\_\_\_
4. What is -20 expressed as an 8-bit binary number in 2's complement notation?  
a. Answer: \_\_\_\_\_
5. 1100011 is a 7-bit binary number in 2's complement notation. What is the decimal value?  
a. Answer: \_\_\_\_\_

**Question (3):**

I- Add 010011112 to 001000112 using signed-magnitude arithmetic.

II- Add 100100112 (-19) to 000011012 (+13) using signed-magnitude arithmetic.

**Question (4):**

I- Subtract 010011112 to 011000112 using signed-magnitude arithmetic

II- Subtract 011000112 (99) from 010011112 (79) using signed magnitude arithmetic

III- Subtract 100110002 (-24) from 101010112 (-43) using signed-magnitude arithmetic.

**Question (5):**

I- Express 2310 and 910 in 8-bit binary one's complement form.

II- Add 2310 to -910 using one's complement arithmetic.

III- Express 2310, -2310, and -910 in 8-bit binary two's complement forms.

IV- IV- Add 910 to -2310 using two's complement arithmetic

**Question (7):**

- (a) The 2s complement of  $(01010)_2$  is .....
- (b) The 2s complement of  $(0.0010)_2$  is .....
- (c) The 10s complement of  $(4887)_{10}$  is .....
- (d) The 10s complement of  $(48.87)_{10}$  is .....

**Lab (2) Registers types (part 02)**

**Objectives**

- ❖ Identify computer registers and there functions

**Question (1): List types of data registers?**

- 1-
- 2-
- 3-

**Question (2): List types of Sections Registers?**

- 1-
- 2-
- 3-

**Question (3): What are the Differences between AH & AX?**

-----  
-----  
-----  
-----  
-----

**College of Engineering & Technology
