## Chapter: 02: Quadratic Equation

#### **EQUATIONS:**

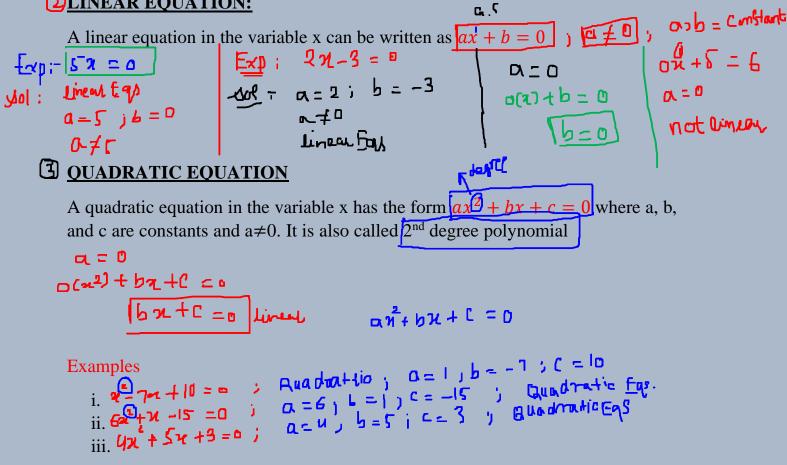

An equation is a statement of equality between two expressions called members.

(5 Jx=9 = R.HG1.H.S. ELantb=0 exD .

#### CONDITIONAL EQUATION OR SIMPLY AN EQUATION:

An equation which is true for only certain values of the variables (or unknowns) involved is called a conditional equation or simply an equation

G.S

iv. 
$$3\frac{1}{2}$$
 =  $1$  =  $-3$ ,  $b = -1$ ;  $c = b$ ; Cauad Tatieted  
v.  $3\frac{1}{2}$  =  $4$ ;  $3\frac{1}{2}$  =  $4 = 0$ ;  $a = 1$ ;  $b = 0$ ;  $c = -4$ ; Buod ration

#### **AN INCOMPLETE QUADRATIC EQUATION:**

If b=0 and c=0 in quadratic equation is called incomplete quadratic equation. pure envident li F91. 622 h=0

Exa

iv.

# (ZEROS)OR ROOTS OF THE EQUATION:

To solve  $ax^2 + bx + c = 0$ , is to find the value of x which satisfy the equation, these value of x is called zero or root of the equation. Or the solution of an

equation is called root  

$$\gamma_1 \gamma_2 \gamma_1 \gamma_1$$
  
Example:  
1.  $w^2 - q = 0$   
 $\gamma_1 = 1$   
 $w^2 = q$   
 $\gamma_2 = 1$   
 $w^2 = q$   
 $\gamma_2 = 1$   
 $\gamma_1 = 1$   
 $w^2 = q$   
 $\gamma_2 = 1$   
 $\gamma_1 = 1$   
 $\gamma_1 = 1$   
 $\gamma_2 = 1$   
 $\gamma_1 = 1$   
 $\gamma_2 = 1$   
 $\gamma_1 = 1$   
 $\gamma_1$ 

### **METHODS OF SOLVING QUADRATIC EQUATIONS**

There are three basic technique to solving a quadratic equation

- **W** By factorization
- 2 By completing square
- 3 By quadratic formula

() <u>SOLUTION BY FACTORIZATION:</u>		
It involves factoring the polynomial $ax^2 + bx + c = 0$ , it makes use of the fact that if $ab=0$ then $a=0$ or $b=0$		
$\left[\frac{\alpha}{\lambda-2}\right]^{-3} = 0$
