

Create Hybrid Character through Blending with Layer Masks and Gradients in Photoshop

What is hybrid Character?

- Of mixed character; composed of different elements
- A hybrid from different species or varieties

Assignment:

- Collect minimum 6 to 8 elements, objects, textures and images for your Hybrid character and blend them through the layer masking and gradient technique.
- For character you can use any fictional, cartoon and any real life character. There must be a proper concept behind the hybrid character which you will create through blending in Photoshop with layer masking and gradient.

You can select:

Charlie Chaplin

Frankenstein

The Mask Jim Carry's character etc

Do search about different characters... Enhance your research power

- ❖ Do not use any animal (Only animal texture and fur can be used) and weird characters
- ❖ Character should be aesthetically strong... again do not use any weird visual
- Must use different brushes (sizes and Shapes). For harmonization must use adjustments (brightness and contrast, colour corrections and curves etc).

Examples:

There is no any example.... because it is unique character which you are going to create. So please use your mind.
